

TDI

Over 90 percent of the diisocyanates' market is dominated by two diisocyanates: TDI and MDI. Both are considered harmful to human health in their uncured form.

How can this chemical affect my health?

Acute (Short Term) Effects

Toxic to Humans & Animals – Can be fatal on contact, ingestion or inhalation for humans and other mammals.

Irritates the Eyes – Can cause irritation or serious damage to the eye.

Irritates the Skin – Can cause irritation or serious damage to the skin.

Chronic (Long Term) Effects

Cancer – Can cause or increase the risk of cancer.

Asthma Trigger – Can result in high sensitivity so that small quantities trigger asthma, nose or sinus inflammation or other allergic reactions in the respiratory system.

Other Health Effects – Can cause serious damage on contact or ingestion.
